Curriculum: The winter curriculum follows the chapters in the book *Homo Sapiens: an owner's manual* (included free with sign-up). Each session reviews the information in each chapter, but then the bulk of the session is experiential in nature. The student has the opportunity to form a meaningful relationship to each of the archetypes under review — how those archetypes are wired to influence his/her life. There is the additional opportunity to re-write the role definition for those archetypes so that they function in more proactive ways.

The thrust of the book is to define human development, from birth to enlightenment, from both a linear progression up a ladder of development, and a Jungian 'negation and higher return' model. We've blended these together to give a more realistic way to define human development. As such, the classes allow the student to identify where in this progression they are currently, where they might be stuck, as well as map the road ahead.
